

YUVA KISHORE REDDY PALLE

QA Engineer | Manual & Automation Testing | Selenium | Java | API (Postman) | Agile QA

+91 9182388604 | yuvakishoreddy1233@gmail.com | linkedin.com/in/palle-yuva-kishore-reddy | Hyderabad

SUMMARY

Detail-oriented QA Engineer with one year of experience specializing in manual and automated testing of web applications using Java and Selenium. Proven track record in enhancing test coverage by 30% and accelerating defect resolution by 40% through efficient Jira management. Skilled in analyzing user requirements and system functionality to deliver high-quality software products within Agile environments. Adept communicator and collaborator, committed to driving team success and continuous improvement.

KEY ACHIEVEMENTS

- Increased testing coverage by 30% through manual and automation practices.
- Reduced defect resolution time by 40% using efficient tracking in Jira.
- Automated 80% of regression tests for faster execution and delivery.
- Improved test case execution speed by 25% using enhanced framework.

EXPERIENCE

CognitivZen Technologies — Hyderabad, India

Trainee QA Engineer | Nov 2024 – Nov 2025

CognitivZen Technologies is an IT services company providing software development and quality assurance solutions across various industries.

- Designed and executed manual and automated test cases for web applications.
- Automated functional and regression test suites using Selenium with BDD Cucumber.
- Conducted API testing using Postman and documented results.
- Logged, tracked, and verified defects in Jira to ensure timely resolution.
- Participated in Agile ceremonies including sprint planning, stand-ups, and retrospectives.

EDUCATION

Jawaharlal Nehru Technological University Hyderabad (JNTUH) — Hyderabad, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

SKILLS

Manual Testing | Automation Testing | Regression Testing | Smoke Testing | Sanity Testing

Selenium | TestNG | BDD Cucumber | Java | Python | Postman | Jira | Agile | SDLC & STLC

PROJECTS

SF Project | Social Media Platform

- Executed manual testing (functional, regression, smoke, sanity, and UAT) for key features such as posts, feeds, notifications, and user interactions.
- Conducted API testing using Postman for endpoints including authentication, posts, comments, likes, and notifications.
- Logged, tracked, and verified defects in Jira, ensuring timely resolution and improved release quality.
- Designed and maintained comprehensive test cases and suites in Kiwi TCMS for full test coverage.
- Actively participated in Agile ceremonies—sprint planning, daily stand-ups, sprint reviews, and retrospectives—to drive iterative development.

VirSec | Cybersecurity Platform

- Collected and prepared software deployment packages across multiple environments.
- Managed and versioned builds using JFrog, ensuring release readiness and consistency.
- Gathered and analyzed deployment data through LLMS for effective monitoring and tracking.
- Collaborated with QA and development teams to ensure smooth and timely package delivery.
- Tracked tasks and updates in Jira, maintaining transparent cross-team communication.
- Participated in Agile ceremonies—including stand-ups, sprint reviews, and retrospectives—to align deployment and testing efforts.

Website Enhancement | CognitivZen Technologies

- Designed and executed both manual and automated test cases to validate website functionality and performance.
- Automated functional and regression test suites using Selenium with BDD Cucumber for improved test efficiency.
- Analyzed business requirements and prepared detailed test scenarios and documentation.
- Performed regression testing to ensure stability and consistency after code updates.
- Managed test cases and test data to maintain accuracy and effective coverage.
- Partnered with developers to resolve automation issues while tracking and verifying defects in Jira for prompt resolution.
